

# TANNIN 50

SCE products

chestnut extract microencapsulated

SCE technology

*Spray Cooling Encapsulation*

## COMPOSITION

100 grams contain:

*Active ingredient:* Chestnut extract grams 50

## PRODUCT CHARACTERISTICS

Tannin 50 presents a microencapsulated form composed by a vegetal fatty acids matrix that allows a slow release of the molecule all along the intestinal tract.

Positive effects of the natural extracts of chestnut wood on gastrointestinal tract consent to maintain a high level of ingestion forming also a protective film on intestinal mucosa that hinders the adhesion of pathogens on the surface of enterocytes.

Administration of Tannin 50 is effective on:

- **Decrease of intestinal peristalsis**
- **Feces more compact**
- **Moisture content of the litter**

- **Health status**

- **Decrease of bacterial colonization**

## INDICATIONS

**Poultry/Swine/Calves/Rabbits:** Astringent properties.

Active ingredient effective if accompanied by a correct management and balanced diet.
